

THE WORLDWIDE LEADER IN STEAM SOLUTIONS

DEALERS

OUR BEGINNINGS

Since 1927, Miura has been committed to developing, manufacturing and servicing the most efficient steam, hot water & modular boiler systems in the world. And that commitment extends to more than simply lower fuel consumption. Miura boilers meet lower NOx standards, reduce maintenance and monitoring needs, and reduce space requirements.

OUR PROMISE

Miura is known around the world for our dedication to quality and our ongoing drive for excellence. Our products are supported by the best engineering technology in the industry and every Miura boiler is backed by a warranty you can count on. By choosing Miura's maintenance & inspection program, you'll be making a wise decision assuring worry-free boiler operation.

INDUSTRIES WE SERVE

Healthcare

Education

Breweries

Food & Bev

Laundry

Gas

CHOOSE MIURA

Miura is growing and we're adding new team members! Are you interested in being a part of our highly motivated, competitive, and industry leading organization? If so, contact us immediately. We offer lucrative compensation packages for those who are focused on winning.

OUR MISSION

Our goal is to save you money. Miura's low water volume design results in optimal heat transfer with fuel-to-steam efficiencies of 85% +/- at all load conditions, which in turn, can save hundreds of thousands of dollars per year.

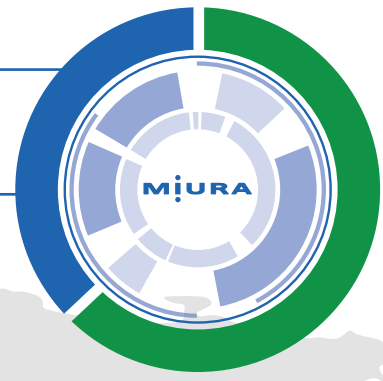

MIURA

Join Our Team

Miura is growing at a fast pace. We are seeking qualified personnel to join our team of highly dedicated professionals. Let us know if you have what it takes to be a part of the Miura Steam Team.

TESTIMONIALS

"Our steam load varies from 5,000 PPH (Pounds Per Hour) to 50,000 PPH, so we were looking for a dependable and reliable boiler system that could give us the proper amount of steam for the low- and high-demand times. Our previous boilers could not run on low loads, and the efficiency would decrease drastically. The Miura boilers are very efficient and environmentally friendly, and require very little attention when operating, plus they take up a lot less room."

- Jack Avant, Engineering Manager, Gulistan Carpet

"We were running a pretty efficient operation, but with Miura technology, we estimated an additional 10 to 20% fuel saving, and that really got our attention."

- Paul Gackel, PE, Director of Facilities/Utilities, Spangler Candy

"Right now North Carolina is in a drought situation. I'm attending lots of meetings on what can be done about water conservation and Miura boilers, because they are so small and efficient, have really put us way ahead of everybody around town - and this industry - on water conservation."

- Shannon Clifton, Engineering Supervisor, Duke Raleigh Hospital
